Shannon Romein  
Solicitation Manager, State of Michigan  
RomeinS@michigan.gov

Dear Ms. Romein,

We are pleased to submit our response to the State of Michigan's Request for Proposal No. 250000000414, for general Cloud Services.

Over the past six years, our team has diligently worked to establish ourselves as one of the State's most trusted technology partners. We've invested an incredible amount of time collaborating with the State of Michigan's security, networking, and architecture teams to ensure that GCP not only meets but exceeds Michigan's rigorous standards for all deployments, including critical attestations like FedRamp and CJIS. .

Our commitment to the State of Michigan is evidenced by our successful completion of over 30 projects across various state agencies. Time and time again, we've taken complex business problems, and worked hand in hand with DTMB's technical teams, and business partners at the agencies to collaborate and design unique solutions to solve these problems. Many of these solutions leveraged cutting-edge technologies like AI and machine learning.

In doing so, we've delivered a better (and more equitable) overall experience to all of Michigan's 10 million residents. This can be seen through easier access to information, quicker processing of applications, and most importantly, a shorter time to receiving benefits. The expansion of our partnership through this expanded contract will provide us an even greater opportunity to partner, collaborate, and deliver even greater impact for our fellow residents.

We are confident that our team's expertise, experience, and dedication make us the ideal partner to support the State of Michigan's cloud journey. We are committed to providing exceptional service, delivering innovative solutions, and exceeding expectations in every aspect of our engagement.

Thank you for considering our proposal. We look forward to the opportunity to continue our partnership with the State of Michigan and contribute to its success.

Sincerely,

Charlie Henderson  
Principal, Google Public Sector - State of Michigan
