

Schedule B – Pricing

Oracle provides competitive and predictable pricing through our global price parity, flexible billing models, and license portability. Every Oracle cloud region is priced the same across the globe, providing customers flexibility and choice. Customers have the option to select their preferred form of billing between Oracle Annual Flex or Oracle Funded Allocation cloud subscription models.

Under Annual Flex, customers commit to a fixed annual dollar amount for Oracle Platform as a Service (PaaS) and Infrastructure as a Service (IaaS) services and are billed quarterly. Under Oracle Funded Allocation are only billed monthly in arrears for the Oracle PaaS and IaaS cloud services they consume.

Begin Oracle Confidential Information

Oracle provides the following discounting based on dollar amount thresholds:

- \$0-\$99,999: 0%
- \$100,000-\$499,999: 4%
- \$500,000-\$999,999: 9%
- \$1,000,000-\$4,999,999: 14%
- \$5,000,000-\$9,999,999: 19%
- \$10,000,000 + : 24%

End Oracle Confidential Information

Oracle is willing to evaluate additional discounts based on individual orders on a case-by-case basis. All discounts are subject to approval.

Lastly, in addition to discount efforts, Oracle offers 10 TB of data egress for free every month and up to 10x lower egress fees than other providers, eliminating exorbitant fees for simply moving your data. Oracle additionally allows customers to bring their software licenses to Oracle Cloud through our Bring Your Own License program and leverage Oracle Support Rewards for applicable cloud services, reducing on-premise database and middleware license support costs by US\$0.25 for every US \$1 spent on OCI.
